

Multiple User Licenses

Each user of our fonts, or computer that has our fonts installed on it, requires a separate software license. Rather than purchasing additional individual copies of the software package, you can purchase a paper multiple user license. **This license gives you the right to add a fixed number of additional users, or install a fixed number of additional copies of the software package you already have.** Purchasing a multiple user license is *less* expensive than purchasing individual copies of the software.

To calculate the price of a multiple user license, determine the number of users or computers you need to add. Find the matching Multiplier for that number of users in the table above. Multiply this times the current price for a single copy of the software. So to add 10 additional users to a \$139.50 product, you multiply 2 times \$139.50 = \$279.00. To add 115 users to a \$139.50 product, multiply 13 times \$139.50 = \$1813.50.

10 additional users: \$139.50 product price × 2 multiplier = \$279.00

115 additional users: \$139.50 product price × 13 multiplier = \$1813.50
